

Software Requirement Specification (SRS)

Project Title :-

Manual Testing of nopCommerce Demo Website

Prepared By: Sahil Govekar

Version: 1.0

Date: 28 June 2026

1. Introduction

1.1 Purpose

The purpose of this document is to define the functional requirements for manual testing of the nopCommerce Demo Website. The application allows customers to register, log in, search for products, manage a shopping cart, complete the checkout process, and log out.

1.2 Objective

The objective of this project is to verify that the major functionalities of the e-commerce website work correctly and provide a smooth user experience.

2. Scope

The following modules are included in testing:

- User Registration
- User Login
- Product Search
- Product Details
- Shopping Cart
- Checkout
- User Logout

Modules such as Wishlist, Product Comparison, Gift Cards, Vendor Management, Administration Panel, and Order Management are outside the scope of this project

3. System Overview

The nopCommerce Demo Website is an online shopping application where customers can:

- Create an account
 - Log in
 - Search products
 - View product details
 - Add products to the shopping cart
 - Complete the checkout process
 - Log out from the application
-

4. Functional Requirements

4.1 Registration Module

FR-001 The system shall allow a new user to create an account.

FR-002 First Name shall be mandatory.

FR-003 Last Name shall be mandatory.

FR-004 Email address shall be unique.

FR-005 Password shall meet the required validation rules.

FR-006 Password and Confirm Password shall match.

FR-007 The system shall display a success message after successful registration.

4.2 Login Module

FR-008 Registered users shall be able to log in using valid credentials.

FR-009 The system shall display an error message for invalid credentials.

FR-010 The Forgot Password option shall be available.

FR-011 The user shall be redirected to the My Account page after successful login.

4.3 Product Search Module

FR-012 Users shall be able to search products using keywords.

FR-013 Matching products shall be displayed.

FR-014 If no matching products exist, an appropriate message shall be displayed.

4.4 Product Details Module

FR-015 Users shall be able to view product details.

FR-016 Product name shall be displayed.

FR-017 Product price shall be displayed.

FR-018 Product availability shall be displayed.

FR-019 Users shall be able to add the product to the shopping cart.

4.5 Shopping Cart Module

FR-020 Users shall be able to add products to the cart.

FR-021 Users shall be able to update product quantity.

FR-022 Users shall be able to remove products from the cart.

FR-023 The cart shall display the total amount.

4.6 Checkout Module

FR-024 Users shall be able to proceed to checkout.

FR-025 Billing information shall be required.

FR-026 Shipping information shall be collected when applicable.

FR-027 Users shall be able to select a payment method.

FR-028 Users shall be able to confirm the order.

FR-029 The system shall display an order confirmation message after successful checkout.

4.7 Logout Module

FR-030 Users shall be able to log out successfully.

FR-031 After logout, the Login option shall be available again.

5. Non-Functional Requirements

- The application shall be accessible using Google Chrome.
 - Pages should load within a reasonable time under normal conditions.
 - User interface elements shall be readable and properly aligned.
 - The application shall validate mandatory fields before form submission.
-

6. Assumptions

- Internet connection is available.
 - The demo website is operational.
 - Testing will be performed manually.
 - Test data will be created by the tester.
-

7. Out of Scope

The following features are excluded from testing:

- Admin Panel
 - Database Testing
 - API Testing
 - Automation Testing
 - Performance Testing
 - Security Testing
 - Mobile Application Testing
-

8. Conclusion

This document defines the functional scope for manual testing of the nopCommerce Demo Website. Testing activities will focus on validating the core customer functionalities including registration, login, product search, shopping cart, checkout, and logout.
